Lake LBJ and Lake Marble Falls drawdown

LCRA has extended the drawdown of lakes LBJ and Marble Falls through Feb. 24.

LCRA began the drawdown on Dec. 30, but paused the lowerings Jan. 2 after recent rains prompted LCRA to partially open a floodgate on Tom Miller Dam. The drawdown will resume after flood operations at the dam conclude early next week.

As previously announced, Lake LBJ will be lowered about 4 feet and Lake Marble Falls will be lowered about 7 feet during the drawdown. Lake LBJ now is expected to reach its lowered level by Wednesday, Jan. 9, and Lake Marble Falls is expected to reach its lowered level by Saturday, Jan. 12, but those dates could change if the region gets additional rain.

LCRA has extended the drawdown five days, and the refill now is scheduled to begin Sunday, Feb. 24, and conclude Thursday, Feb. 28.

Please keep in mind that unforeseen circumstances such as floods or power emergencies could prompt LCRA to change or cancel the scheduled drawdown. Equipment and tools should not be left in the lake unattended and should be removed from the lakebed when not in use.

Visit lcra.org/lakelowerings for more information, including the lakewide permits, permit notices and FAQs. **If you have any questions, please call LCRA Water Quality Protection at 512-578-2324.**
